Tolerance is one of the Islamic morality that characterizes the one who had a sincere faith in his heart; where facing abuse to Charity is not easy and is considered a simple behavior, but it needs to have deep love and faith in The heart of the person; As Islam came to complete the morals, and urge to adhere them in order to build a strong Islamic society , The human nature is normally mistaken and needs to be forgiven and forgiveness for Errors, God Almighty the Forgiving, and the Merciful, forgive those who make mistakes, so how can not be a Muslim person tolerant.

Sheikh Zayed bin Sultan Al Nahyan (may God bless him and grant him peace) said: «Tolerance is a duty The Greatest Creator Almighty forgives, we are human beings, he creates us do not we forgive?" Khalifa bin Zayed Al Nahyan (may Allah preserve him): «The UAE and tolerance are two sides of one meaning ... and the embodiment of the purpose sought by humans through their history »

The words of Sheikh Mohammed bin Rashid Al Maktoum (preserved by God): «We want UAE to be the main global reference in a culture of tolerance, policies, laws and practices »

Tolerance is defined as a transgression of the mistakes of others and an encounter with abuse of charity, forgiveness and love of good And acts of tolerance to achieve the true meaning of it; some may speak of tolerance in his words but his heart is full Hatred and hatred of the abuser, and this does not apply to the concept of tolerance because tolerance must be out From the heart before the saying and it appears from the acts; usually When a person receives abuse, reprisals and abuse in the same way is the first thing that comes to mind Therefore tolerance is considered a morality that needs sincere faith.

The Prophet (peace and blessings of Allaah be upon him) was characterized by tolerance in his life and his dealings with others Indicates the forgiveness

One of the situation that indicates his tolerance peace be upon him, when hetolerate and forgave the Arab who wanted to kill him, As he went "The Prophet (peace and blessings of Allaah be upon him" rested under a tree, and his sword hung on it, He said to the Prophet (peace and blessings of Allaah be upon him): «Who prevents you from me?» The Prophet replied: «God» A sword dropped from the hand of the Arabi, and the Prophet took it from him, and said to the Arabis: «Who prevents you from me?» He said «Be good taking» The Prophet said to him, «Do you declare that there is no God but Allah and that I am the Messenger of Allah?» He answered "I promise you not to fight you and not to be with people who would fightyou »and left him peace be upon him, and when the Arabi reached His companions said, «I came from one of the best men ever.» Who can be tolerant is considered to be the most powerful human beings on Earth , Because touch Patience and amnesty can only be felt by self-confidence and strength, as the acceptance of the other person on Its disadvantages indicate the strength of the person. The forgiver earns reward and reward from God Almighty, as he earns the love of people and their trust in him and the love of his worship The person who takes revenge makes it difficult to deal with him for fear of retaliation or abuse. The importance of tolerance is to discharge negative energy, which charges the body with positive energy; hate, hatred and abuse The body generates negative energy, which makes the person incapable of production, thinking and creativity The interdependence of the members of the same society, and the spread of love and intimacy among them, resulting in a strong and cohesive society is difficult to penetrate and control, and the values of the Tolerance and communication and co-existence in the community, and the commitment to tolerate, UAE is the model of tolerance which can be presented to the world to become part of Social virtues as well as tolerance in society through policies, legislation and openness to other human cultures .

Transforming the jealousy of the child into an incentive

and ambition is a wonderful way to help reduce The child's negative feelings and reinforce his positive goals, for example, if the child feels sad Because his friend or brother has received excellent marks on the exam, he should be encouraged to study further In order to get higher and better marks, when the child goes To study, he forgets his jealousy, and focuses on achieving the goal of excellence.

Comparing the child with his peers

The comparison of the child's performance with others leads to the devaluation of the child and thus the child's feeling that Parents do not like him enough, or they love his brother more than him, so jealousy grows between them The child feels that the parents love him more than anyone else, the jealousy between him and his brothers will diminish, so You should communicate with the child every morning, spend time with him, and be communicative Either by soft touching, or smiling, or listening to him, paying attention to everything he says, or does whatever He was, trying to see things from his point of view.
